Customizable Professional Development

Mission

Customizable Professional Development's primary purpose is to improve educational outcomes for today's student by providing high quality, targeted professional development for their teachers.

Dedication

Our instructors provide meaningful professional development for teachers in order to increase their students' learning outcomes. Our approach of professional development models an individualized approach to education that in many ways is lacking in today's schools. Our instructors share the mantra of - "No Busy Work" in our course offerings!

Commitment

CPD is committed to ensuring that what you learn in our courses is implemented effectively into your classroom. Our instructors are always available to answer your questions and help you brainstorm solutions and strategies - even after you complete your course!

CPD Classes

We offer several credit types to meet the needs of educators across the country. We offer the following credit types:

[In-Service Credits \(Open Enrollment\)](#)

[Graduate Credits - MidAmerica Nazarene University](#)

[Graduate Credits - Boise State University](#)

[NYS CTLE Hours](#)

[NYC A+ Credits](#)

[NYC P Credits](#)

[LAUSD Salary Points](#)

[Central Michigan University - Michigan SCECH](#)

[Cleveland State University - CEUs](#)

[Nevada - State Approved PD Provider](#)

[NYS Coaching Courses](#)

[NYS Workshops - DASA, School Violence, Child Abuse, Autism](#)

[Micro Credentials](#)

Multi-Course Packages

Three Packages Available, Three Chances to Save \$\$

Package #1 - 3 courses for \$500 (\$100 Savings!)

Package #2 - 5 courses for \$700 (\$300 Savings!)

Package #3 - 7 courses for \$900 (\$500 Savings!)

Graduate Credits Available as add-ons to all packages!

Why CPD?

Grad Level Courses

Many of our courses are approved for Graduate Level Credit through MidAmerica Nazarene University and are reasonably priced.

Flexible Learning

CPD courses are fully online and accessible 24/7. Learn when and where your busy schedule allows! Our user friendly LMS is a breeze to learn!

Stay Current

Our courses are research based and focus on current instructional practices and standards. Each semester we add new course titles to help coach teachers on new educational trends, technology and instructional practices.

Learn From Experts

Our instructors are all still classroom teachers. Many of our instructors have received degrees in instructional technology and are Google Certified!

Course Catalog

[#NoFakeNews: Teaching Information Literacy \(CPD-258\)](#)

This course will help both you and your students navigate the many credible databases that exist, learn search terms, feel confident in research, and eliminate the #fakenews and plagiarism that students so often fall victim to when the research process becomes overwhelming or hits a dead end.

This course will focus on the five different research strategies that help students and teachers develop strong research skills, which is also known as information literacy or media literacy:

- clarify
- search
- delve
- evaluate
- cite

[21st Century Skills: From Your Classroom to the Workplace and College \(CPD-164\)](#)

The workplace and higher education settings we are preparing our students for is much different than what we as their teachers encountered coming out of high school 10, 20, or 30 years ago. The evolution of technology, collaboration and communication methods has rewritten what it means to be college and career ready in this century. Teachers in this class will look at methods and strategies for increasing the amount of 21st Century workplace and college skills in their classroom. Areas of exploration will include PBL, the flipped classroom, blended learning and digital collaboration and sharing. This course is appropriate for all K-12 educators.

[A Classroom Brand and Identity \(CPD-206\)](#)

Technology has become ubiquitous in today's classroom. With all of these innovations in technology, it's important to take time to reflect on how to most effectively use our time with the most appropriate tools for learning. We will explore ideas for parent communication, update classroom websites with engaging reinforcement & enrichment activities, and explore how to utilize QR Codes in the classroom. By utilizing professional Twitter accounts, students will have the latest educational updates and ideas from the gurus in education. This class will allow you to apply technology to any discipline of elementary education to make your teaching even more engaging. Each educator will have the opportunity to create student resources, collaborate with their peers, and exchange ideas and best practices.

[A New Bully – The Cyberbully \(CPD-238\)](#)

Bullies have always existed, so why is it important to address cyber-bullying? In a nutshell, it can be extremely detrimental to the victim's physical and mental health and, in some cases, possibly deadly. Since cyber-bullying allows the anonymity of bullying from a distance, it can also be easily hidden from parents, friends and school administrators and adds an almost invisible dimension to the traditional face-to-face bullying that can be hard to detect and address. A primary goal of this course requires that teachers will learn various techniques that they can implement upon return to their classrooms. Additionally, teachers will reflect on what they are learning and propose a way to integrate cyber-bullying content into the classroom curriculum. This course is appropriate for all K-12 school professionals.

[Achieving Literacy Gains for Students with Limited English \(CPD-246\)](#)

Our country's diversity and demographics have changed what our classrooms look like. We all encounter students that have limited English, and we need to differentiate instruction to meet their needs. In order to meet academic success, this population needs to make linguistic gains in order to begin to master course content. Participants will work with evidence-based practices and instructional intervention strategies to improve language skills for this population.

[Acquiring Parent Involvement and Support \(CPD-174\)](#)

Each day we as educators have reasons to reach out and communicate with parents. Our changing educational and technological landscape has really altered how we accomplish obtaining a strong level of parental involvement and support. Just as importantly, the American family looks much different than it did years ago. With changes in student population groups, these changes in family structures become even more complex. Educators in this course will examine methods for utilizing technology to engage parents and achieve their support in the education process.

[Adapting Instruction to Reduce Unwanted Behavior \(CPD-180\)](#)

We often look at behavior as something that needs to be addressed before instruction can occur. Research shows that with the right instructional tools, we can limit those unwanted behaviors that interrupt the learning process. Educators in this course will examine dozens of research-based strategies to address behavior through instruction. Each educator in this course will focus on specific behaviors from their classes and will utilize research-based strategies for overcoming these barriers to learning.

[Adding Mindfulness and Meditation Into Your Classroom \(CPD-266\)](#)

Mindfulness when integrated into the classroom, can transform classroom and school culture. We as educators understand that we are living in a time when social emotional learning is an urgent matter. Mental health issues and school violence are on the rise. So many students are emotionally deprived, socially disconnected, foundationless, and uncentered. We as educators need to get back to where the whole child is cared for and nurtured. Creating a safe haven and a refuge for children of all backgrounds and abilities. Giving the students the ability to face difficult emotions and discover what is really is the underlying issue. Educators in this course will develop strategies for putting mindfulness activities into their classrooms to improve student learning outcomes and behaviors.

[Adding Yoga Into Your Classroom \(CPD-252\)](#)

Today's children are more anxious and stressed at school than ever before due to more rigid testing requirements and higher academic and social expectations. The prevalence of behavior and emotional disorders is on the rise in children. In this course you will learn ways to figure out how to help these children by giving them the tools to calm themselves during anxious moments, quiet their minds of the negative thinking, and feel good about themselves in general. Begin introducing some breathing techniques, guided visualizations, and a few postures a few minutes each day. As teachers, we all face the dilemma of not having enough time to teach with depth and it seems like we are always just scratching the surface. We are bombarded by paperwork, testing requirements, classroom management issues, and now core curriculum expectations. Most teachers would say, "How do you expect me to fit yoga into my already jam-packed schedule?" The answer is , as a teacher who Incorporating yoga can be as simple as 10 minutes a day.

[Addressing Conflict through Restorative Justice Practices \(CPD-326\)](#)

New Course!

Restorative justice is a theory of justice that focuses on mediation and agreement rather than punishment. Offenders must accept responsibility for harm and make restitution with victims. Teachers who use restorative discipline practices find that behavior in their classroom improves dramatically. They have better relationships with their students and, therefore, less stress from unresolved conflicts. For the growing number of districts using restorative justice, the programs have helped strengthen campus communities, prevent bullying, and reduce student conflicts. And the benefits are clear: early-adopting districts have seen drastic reductions in suspension and expulsion rates, and students say they are happier and feel safer. This course is appropriate for all K-12 school professionals.

[Addressing Disciplinary Literacy \(CPD-232\)](#)

When students enter middle and high school, their teachers expect that they have learned the basic skills and strategies for reading and comprehending text. Students who are still working to develop these proficiencies may need assistance from their classroom teachers and, in some cases, from specialists in reading or special education, to support their reading and writing in the classroom. This course will help educators to learn to create effective integrated literacy experiences for all students in every discipline. An important focus of the course is the development of discipline-specific and academic language. Teachers will examine and analyze the unique characteristics of the literacy patterns of their individual discipline and acquire strategies for addressing these patterns to improve comprehension. Disciplinary literacy needs to be seen not as an add-on, but to an end, that end being deeper understanding and transfer of learning for all students. This course is appropriate for all K-12 school professionals.

[Addressing the Impact of Poverty \(CPD-244\)](#)

There are between 15 and 20 million American children living in poverty today. Poverty impacts performance in class, as well as the ability to prepare for learning at home. For educators to overcome the devastating impact poverty has on learning, they must first understand the relationship between academic achievement and socio-economic status. Educators will gain strategies and tools to assist and meet the needs of impoverished youth.

[Adjusting the Norm – Strategies for Embracing All Cultures in the Classroom \(CPD-242\)](#)

As our country's demographics shift, the impact can be seen in the classroom as we are teaching students from across the world. There is great potential for embracing cultures and enhancing instructional activities, while bridging cultures between home and school. Educators will review research-based strategies to better incorporate students from other cultures into the classroom. Educators in this course will become empowered to adjust instructional delivery to meet the needs of their classroom's changing demographics and improve educational outcomes for all students.

[Adolescent Literacy \(CPD-222\)](#)

Literacy skills are essential in order to participate in today's increasingly global society and economy that demand the ability to effectively use literacy in multiple contexts for multiple purposes. Today's adolescents have greater literacy demands placed upon them than ever before as they prepare to enter an adult world that requires their ability to read, write, and speak successfully. Today's teachers face greater challenges than ever before in meeting the increasingly diverse literacy needs of their students in order to prepare them for success in the adult world. This course will prepare you to assist your adolescent students who struggle with literacy to achieve literacy success by providing strategies and techniques that you can

incorporate into your secondary classroom in order to scaffold your students' literacy development. In this course, you will learn to implement research-based instructional practices that scaffold adolescents' literacy development in the areas of motivation, engagement, reading expository text, using prior knowledge, vocabulary, comprehension, writing, and studying.

[Advancing ELL Family-School Relationships \(CPD-168\)](#)

English Language Learners are the fastest growing group of students that today's schools services. This course will assist educators in developing strategies and skills to understand ELL students' backgrounds and how to establish and grow strong family relationships. Educators will develop classroom skills to use in their classrooms to improve instructional outcomes. Educators will examine belief systems and research based practices for serving diverse cultures and languages in the classroom, as well as methods for ensuring a positive classroom culture and climate.

[Aiming Towards Eliminating Problem Behaviors \(CPD-240\)](#)

Every teacher across the country deals with some form of a problem behavior in the classroom. This course will present strategies for preventing these behaviors and responding to them. Participants will develop the capacity to provide a caring, energetic, and safe classroom atmosphere where all students are encouraged and engaged. Participants will also examine methods for adapting instruction to prevent behaviors before they occur.

[Aligning Your ELA Class to the Next Generation Learning Standards \(CPD-202\)](#)

As we transition into another governing set of learning standards, it is essential to unpack and familiarize ourselves with the Next Generation Learning Standards. While it can be frustrating to align our classrooms to yet another set of standards, it is essential to realize that these standards are aiming to better support educators in their instructional practice and provide us with the tools for preparing our students for the 21st Century. This course will assist educators in getting started with the Next Generation Learning Standards and aligning their materials and lessons to these new and improved requirements. Each educator will have the opportunity to create student resources, collaborate with their peers, and exchange ideas and best practices.

[Aligning Your Math Class to the Next Generation Learning Standards \(CPD-200\)](#)

As we transition into another governing set of learning standards, it is essential to unpack and familiarize ourselves with the Next Generation Learning Standards. While it can be frustrating to align our classrooms to yet another set of standards, it is essential to realize that these standards are aiming to better support educators in their instructional practice and provide us with the tools for preparing our students for the 21st Century. This course will assist

educators in getting started with the Next Generation Learning Standards and aligning their materials and lessons to these new and improved requirements. Each educator will have the opportunity to create student resources, collaborate with their peers, and exchange ideas and best practices.

[Aligning Your Science Class to the Next Generation Learning Standards \(CPD-204\)](#)

As we transition into another governing set of learning standards, it is essential to unpack and familiarize ourselves with the Next Generation Learning Standards. While it can be frustrating to align our classrooms to yet another set of standards, it is essential to realize that these standards are aiming to better support educators in their instructional practice and provide us with the tools for preparing our students for the 21st Century. This course will assist educators in getting started with the Next Generation Learning Standards and aligning their materials and lessons to these new and improved requirements. Each educator will have the opportunity to create student resources, collaborate with their peers, and exchange ideas and best practices.

[All Learning Types: Differentiating Instruction to Meet the NGLS \(CPD-248\)](#)

This course is designed to provide educators with the resources to create a learning environment that will maximize the potential for student success by using the strategies associated with differentiated instruction. In this course the educator will gain knowledge of how to manage instructional time in a way that meets curriculum standards and also provides motivating, challenging, and meaningful experiences for school age students by differentiating instruction. Participants will be presented with a variety of strategies for differentiating instruction by establishing a foundation in the principles of differentiated instruction. They will understand what defines differentiation and recognize their role and responsibilities in a differentiated learning community. Practical applications of how to differentiate with the content, process, and product will be explored while planning differentiated lessons. They will establish quality criteria and assessments to clarify and evaluate assignments. At the end of this course the educator will be able to modify, adapt, and design new approaches to instruction in response to students' needs, interests, and learning preferences. They will possess a repertoire of strategies for differentiating instruction that will allow them to respond to the diverse needs of the students in their classroom.

[Alternatives to Suspension \(CPD-170\)](#)

Suspending students has been a part of the school world we work in for decades. There are often very real and necessary reasons for suspending students. When we take a look at what a suspension is, and the impact it has on learning outcomes – we would be better served avoiding suspensions as much as possible. Educators in this course will take a look at behavior and different approaches for avoiding suspensions that could be implemented both

at the classroom and building levels. Educators will develop strategies for making connections and addressing behaviors in a manner that prevents suspensions. This class is appropriate for all K-12 educators and PPS Staff.

“If a child doesn’t know how to read, we teach.”

“If a child doesn’t know how to swim, we teach.”

“If a child doesn’t know how to multiply, we teach.”

“If a child doesn’t know how to drive, we teach.”

“If a child doesn’t know how to behave, we ...punish?”

[Anti-Bullying Strategies For The Classroom \(CPD-154\)](#)

We have all read the stories, seen the videos and experienced the impact of bullying. It is perhaps one of the longest lasting epidemics in the educational world. As a profession we have made great strides in preventing bullying in the school, yet there is so much more work to be done. This course will focus on establishing a safe learning environment where all students can learn. Strategies for preventing bullying and assisting the victims of bullying will be addressed. This course is recommended for all K-12 educators.

[Anxiety and Stress Management in a School Setting \(CPD-220\)](#)

Anxiety and stress are major factors in the lives of both school professionals and students. The purpose of this course is to enhance student performance by minimizing the negative effects of stress in the classroom. Participants learn a working definition of stress and anxiety, study research findings on the cause of stress, learn reasons explaining its impact upon teaching and learning, and conduct a thorough assessment of stress factors in their classrooms. This knowledge facilitates application of tools and techniques to identify, prevent, and manage stressors to improve academic success. Participants will also identify specific students experiencing debilitating stress and take actions to address these problems and help the student restore personal equilibrium and enhance their performance. This course is appropriate for all K-12 teachers and school professionals.

[Anxiety Disorders and Other Emotional Disturbances \(CPD-160\)](#)

Anxiety related issues, just as in our society, are on a rise in today’s classrooms. Each year, schools are seeing more students with diagnosed anxiety conditions and emotional disturbances. Educators taking this course will build strategies and techniques for meeting the needs of the emotionally disabled student in the mainstream classroom. Educators will research, analyze, and develop effective strategies on building positive personal relationships

with students and behavior modifications for this population. This course will offer recent research on behavior modification programs and their implementation in the classroom. Through internet articles, websites and case studies, participants will focus on how to provide a safe and predictable structure that students with E.D. require. This course is appropriate for both regular and special education teachers and PPS Staff.

[Applying Evidence Based Practices to Improve Classroom Management \(CPD-182\)](#)

This course will deeply analyze and develop strategies for improving classroom management. All strategies are evidence based and will help teachers improve their management of physical space, instruction, routine development, correcting behavior and issuing consequences. Teachers will develop proactive strategies that will improve student learning outcomes and behavioral outcomes. This course is appropriate for all K-12 teachers and assistants.

[Applying Research Based Strategies to Build Study Skills \(CPD-166\)](#)

The 21st Century classroom presents us with all types of learners, needs and skill levels. Developing research-based strategies that can help all students improve the essentials – reading comprehension, writing, and study skills – helps all educators. This course will allow educators to build skills and instructional strategies for improving students ability to listen, note-taking, textbook reading, test taking strategies, and paper/essay writing. This course will also introduce strategies for teaching students anxiety and stress reduction techniques. This class is appropriate for all K-12 general and special education educators.

[Approaches For Changing Student Behavior Using PBIS \(CPD-172\)](#)

The barriers that occur to learning cannot be single-handedly removed. Unfortunately, one such barrier occurs when behaviors are disrupting the learning community. The climate of each school community is different. Therefore, a “one size fits all” approach is not as effective as interventions based on the needs of each school. Positive Behavior Interventions and Supports (PBIS) is a proactive approach to establishing the behavioral supports and social culture and needed for all students in a school to achieve social, emotional, and academic success. A system focused on creating school-wide, classroom and individual supports improves academic and behavioral results. This course will assist educators in creating a support system for their classroom that will help to increase behavioral and academic results. This course is appropriate for all regular and special education educators.

[Are You A Culturally Responsive Teacher? \(CPD-208\)](#)

Delivering culturally responsive lessons can not only help you engage students but allow them to make personal connections with content. Greater student investment will lead to many other benefits, such as more rigor and motivation. This course will walk educators

through the process of learning about the link between culture and neuroscience, as well as methods for infusing daily lessons with culturally responsive activities. A happier, focused classroom is the ideal outcome.

[Assessing Remote Students During Remote Learning \(CPD-292\)](#)

Remote learning has introduced many new challenges for educators and students alike. One of these challenges that educators face is assessing students during remote learning. Luckily, many of the foundational concepts of quality assessment and feedback that were true prior to remote learning will guide our remote learning assessments in the online forum. We have many online tools to assist us in providing quality formative assessment opportunities at each stage of our remote lesson. Educators in the class will review the research on formative assessment as well as analyze and develop remote assessment tools.

[Assessment and Innovative Data Instruction \(CPD-190\)](#)

A central aspect of teachers' professional knowledge and competence is the ability to assess students' achievements adequately. Data driven instruction is a precise and calculated approach to improve student comprehension throughout the school year. Implementing and utilizing data to drive instruction is perceived to be an overwhelming task. This course will help educator use data analysis to improve student learning. The use different assessment types and data are at the heart of data driven instruction. Participants will analyze data, focus on increasing rigor in the classroom, types of assessment, and the building blocks to successful data driven instruction implementation. This course is appropriate for all K-12 educators.

[Auditory Processing Disorder \(CPD-158\)](#)

APD is a disorder in affecting a person's ability to understand speech and process auditory information. The impact that this disorder can have on a student is profound. How often do you have a student ask you to repeat something or have a delay in answering your questions? The affects go beyond this. Their classwork, homework, test grades, comprehension and retention all suffer. A student who has trouble processing incoming information or directions, will give answers that seem odd or not even related at all. Their output is affected and can lead to countless errors. This course will focus on what APD is, diagnosing APD, distinguishing differences between APD and other disorders, treatment of APD, classroom modification, teaching strategies, and compensatory strategies to make these students more successful in the classroom. This class is appropriate for all K-12 teachers.

[Authentic Assessment in Physical Education \(CPD-210\)](#)

Personalized learning is taking education by storm, and we need to determine what it looks like in physical education. This course will help physical education teachers learn how to

design and implement the knowledge and skills for students to engage in a lifetime of health and fitness.

Autism Spectrum Disorder (CPD-132)

We have all heard the expression, “on the spectrum,” but what does it mean? What implications would this have on your classroom? This course will review the characteristics of Autism Spectrum Disorder, Asperger’s Syndrome and Pervasive Developmental Disorder. Participants will examine best instructional practices and methodologies. This course is appropriate for all teachers K-12.

Basics of Blended Learning (CPD-118)

Blended learning has continued to gain momentum in the world of education in recent years. Many teachers would love to try blended learning, but do not know where to start. This course will explain the basics of blended learning and introduce the participant to basic and easy resources to start implementing blended learning into their classrooms tomorrow! Participants will create worksheets, lesson plans and a unit plan that put blended learning into practice. This course is appropriate for all K-12 educators.

Battling Teacher Burnout (CPD-268)

Teachers in today’s classrooms have more expectations and pressures placed on them than ever before. The rapid change that we have seen in education is nothing like previous teacher generations faced. Federal and State standards, technological advancements, social emotional initiatives, and teacher ratings have created pressures on teachers that cannot be denied. All teachers have heard about teacher burnout – it is something that has been discussed in faculty rooms by first year teachers and veteran teachers alike. Educators need to develop and work at the skills needed to prevent this burnout. Educators in this course will be able to reflect upon their attitudes and morale, and strategies for improving their morale and professionalism. It is essential to consider how this burnout can impact your teaching practice and, as a result, student achievement. Educators will examine methods for improving morale and avoiding burnout feelings.

Behavior Modification in Today’s Technological Classrooms (CPD-192)

Behaviors are learned through experience and observations. They can also be instinctual and adaptive. For quite some time, the underpinnings of behavior modification have worked through operant conditioning and established consequences. While this theory still has its application and uses today; many teachers, school psychologists, social workers and guidance counselors often find the struggle of reward systems and motivational techniques fading quicker than they once did. In fact, extrinsic and intrinsic motivation hold less merit to students with easier access to technology and the internet. Students in the K-12 population

are more motivated by social status via technological media as less value is held in developing social connections through verbal and tactile experiences. The purpose of this course is to uncover how motivation to behaviors have adapted due to technology and to adequately address and intervene with problem behavior through behavior modification techniques. This course is appropriate for all student support staff members, regular and special education teachers.

[Behavior Modifications and Discipline Strategies \(CPD-162\)](#)

Think about how much time you spend addressing behaviors in your class. Wouldn't it be nice to be able to control behaviors without interrupting your instructional practices? Classroom management and student discipline have been issues in the classroom since the one room schoolhouse. The decisions we make when disciplining a student are imperative for creating a safe and productive learning environment. Participants in this class will create, implement, and assess behavior modification systems for their classroom, as well as examine several models of student discipline while evaluating some of their own discipline policies. This class is appropriate for all K-12 educators.

[Blended Learning in Physical Education \(CPD-296\)](#)

Physical Education is no longer just about getting into teams and playing games. Today, innovative educators in both higher education, corporate learning & development are improving learning through technology, as evidenced by the rapid adoption of technology-assisted teaching methods and blended learning models. We need to keep up with current trends in education and stay relevant. As we continue to navigate our way through remote learning and hybrid instruction, it is essential for us to continue to develop equitable practices to help all students meet success. Participants in this course will also focus on how their experiences and personal biases can impact teaching and learning.

[Bringing More Formative Assessment Into Your Classroom \(CPD-188\)](#)

A teacher's use of formative assessment techniques is essential in ensuring he or she is meeting the learning targets for a unit. Teachers need to know "who knows what" before moving on. Formative assessment is nothing new – our teachers were administering formative assessments to us when we were in school many years ago. In today's digital age, we are lucky to have so many more tools to assist us in our formative assessments. Teachers in the class will review the research on formative assessment as well as explore dozens of instructional tools that can be used for formative assessments. Teachers will leave this course with concrete and easy to use examples for embedding more formative assessments into their lessons.

[Bringing PBL Into Your Math Classroom \(CPD-270\)](#)

As we prepare the 21st Century Students for the 21st Century workforce, we need to arm them with the ability to problem solve and think critically. Project Based Learning is one method for improving critical thinking skills in our students. PBL prepares students for the problem-solving activities the 21st Century workplace will demand. This course will examine PBL methods for a Mathematics Classroom. Teachers will focus on best practices related to PBL and how to increase critical thinking skills and performance. This course is appropriate for all K-12 teachers.

[Bringing PBL To Physical Education \(CPD-186\)](#)

Personalized learning is taking education by storm, and we need to determine what it looks like in physical education. This course will help physical education teachers learn how to design and implement project-based learning with voice and choice so they can offer more innovative lessons for their students.

[Building a Classroom Culture of Resilience \(CPD-228\)](#)

Have you ever wondered why some students seem to be able to push through anything that life throws at them, while others shut down as soon as adversity sinks in? Have you ever thought that if you could teach students to “not give up” and to “get back up when knocked down” that you could better reach your learning targets and goals in the classroom? This course will focus on Grit, Resilience, Stress Reduction, Trauma, Learning from Failure and Mindfulness in the classroom. Educators will have the opportunity to implement research-based strategies and co-construct knowledge with their peers through interactive discussions. Educators will develop a full understanding of what it means to be resilient and how we can integrate strategies at both the classroom and building levels. This course is appropriate for all K-12 educators.

[Building Remote Student Relationships \(CPD-290\)](#)

Building a strong student teacher relationship is one of the main pillars of being a strong educator. This is even more important as we navigate through remote learning. Our students need us now more than ever, and many are looking for a sense of normalcy as we navigate through remote learning experiences. This course will assist educators in their attempt to utilize digital tools during remote learning to build strong teacher student relationships. Educators will explore digital tools such as Padlet, Flipgrid and others to support attempts at building relationships with students.

[CGI Math \(CPD-328\)](#)

New Course!

Cognitively Guided Instruction (CGI) is a student-centered approach to teaching math. It starts with what your students already know and builds on their natural number sense and

intuitive approaches to problem solving. CGI teachers start with what students know and build on their intuitive problem-solving processes so that each and every student grows in their understanding of rigorous math concepts. Research shows that CGI increases: students' math achievement, students' problem-solving experiences and teachers' math knowledge. This course is designed so that teachers meet the needs of their students and make connections between research on children's thinking and their State Math Standards. This course is appropriate for all K-12 school professionals.

[Character Education \(CPD-184\)](#)

Character education provides guidance for youth to understand their abilities, to strive to reach their fullest potential, to care for others and enables all youth positive self-development. Schools can foster this development in and out of the classroom by focusing on intellectual, social, emotional, and ethical character in students. Implementing character development programs that focus on these needs give students the optimal chance at success. Character education is a primary prevention tool used to promote positive youth development, academic achievement, and character development.

[Co-Teaching Methods That Work \(CPD-152\)](#)

The benefits of the co-teaching classroom are immense for our students. Even with the high stakes of a successful inclusion classroom, many teachers have not had the opportunity to develop their co-teaching skills. This course will refresh teachers on special education law, the IEP and other regulations. The relationship between the special education and general education teachers will be examined. This course is appropriate for K-12 General and Special Education Teachers.

[Combating Childhood Obesity Through Physical Education \(CPD-212\)](#)

How can we as educators help prevent childhood obesity? It is not classified information that we have an obesity crisis in America. Children with obesity can suffer from physical, mental, emotional, and social problems. As an educator it can be frustrating figuring out how to address these issues in physical education class. This course will introduce you to the causes of childhood obesity. Knowledge of these factors and their negative consequences will help you as an educator combat the causes of a childhood obesity. Using the techniques from this course, you will be able to promote healthy choices that can positively impact students for the rest of their lives.

[Conflict Resolution – How to Maintain the Peace in Your Classroom \(CPD-138\)](#)

From the first year teacher to a seasoned veteran, classroom management is often identified as an area teachers would like to improve. Teachers are looking to build upon their ability to relate to students and address conflicts as they arise. This class will look at some easy to

implement strategies to assist teachers in reducing conflict and outbursts in the room. Teachers will also examine some basic negotiation and mediation skills that are easy to execute and can help “keep the peace.”

Constructing Critically Conscious Learning Environments (CPD-256)

In this course participants will be introduced to the concept and theory of Critical Consciousness and how it can be applied to classroom instruction to directly affect student outcome and success. Participants will be encouraged to think about their own perspectives and working within a diverse environment. The focus of this course will be on how to infuse the mindset of critical consciousness within our students with also infusing cultural responsiveness in our daily instructional practices. Further, participants will be provided time to reflect upon their own understanding of what it is to be critically consciousness which will help in modeling for students. The key components of both theories will be introduced, discussed and implemented within a variety of instructional techniques and daily classroom interactions. Being able to engage diverse student population has a strong and direct effect on student development and varied tolerance.

Constructing the Creative Classroom (CPD-224)

This course provides teachers with the knowledge and skills to nurture creativity in their students. Among students in our classrooms, creativity varies over a wide range – visual, mechanical, verbal, artistic, linguistic, athletic, mathematical, and analytical. This course defines creativity and describes behaviors most often associated with it. In addition, a model is systematically developed that teachers may use to develop creative lessons. The course elaborates upon the model by adding and covering topics that range from finding problems to critical thinking. Each topic is functionally related to model components. An emphasis is also put on the application of the model to lesson development and teaching creatively. This course is appropriate for all K-12 teachers and school professionals.

Creating a Culture of Learning and Growth Mindset (CPD-194)

The focus on building our students’ growth mindset capacity continues to prove to be an important role for educators. Teachers are often aware of the concepts behind mindsets but have not looked at their lessons and teaching techniques in relation to the concept. Teachers in this course will develop methods for reflecting on their current practices and materials in a manner that will assist their students in growing this essential capacity. Present research and best practices will be evaluated and utilized to improve student learning outcomes in the classroom.

Critically Conscious Remote Learning Environments (CPD-288)

This course will assist educators in creating critically conscious instruction in remote learning settings, to improve learning outcome for all students. Participants will address their diverse student groups and the experiences they bring to the classroom, and how they impact teaching and learning. Course assignments will encourage participants to build a variety of instructional and classroom management techniques that consider multiple perspectives while engaging in remote learning.

Data Driven Instruction (CPD-156)

Data driven instruction is a precise and calculated approach to improve student comprehension throughout the school year. Implementing and utilizing data to drive instruction is perceived to be an overwhelming task. This course will help educator use data analysis to improve student learning. The use of data and student learning objectives (SLOs) are at the heart of data driven instruction. Participants will analyze data, focus on increasing rigor in the classroom, types of assessment, and the building blocks to successful data driven instruction implementation. This course is appropriate for all K-12 educators.

Deconstructing the Opportunity Gap (CPD-260)

A consequence of the widening income gap in the United States is its effects on education in underserved communities. It is widely believed that education is an important steppingstone for financial and personal success. However, as it has been widely documented, students from underserved communities are not being afforded the same opportunities as their peers in more affluent communities. This course will explore opportunities, introduce educators to available resources, and ultimately support teachers in their desire to close the achievement gap of our underserved student populations.

Differentiated Instruction for English Language Learners (CPD-176)

English Language Learners (ELLs) need to have access to K-12 curriculum and be able to achieve the same level of success as their English-speaking counterparts. This course prepares teachers to effectively understand ELLs' backgrounds and to differentiate their instructional approach. By providing the skills to differentiate their instruction through multiple modalities, this course gives a practical, classroom ready application of new learning to improve instructional practice. This course is appropriate for both regular and special education educators.

Discipline Models for the Classroom Teacher (CPD-116)

Classroom management and student discipline have been issues in the classroom since the one room schoolhouse. The decisions we make when disciplining a student are imperative for creating a safe and productive learning environment. Participants in this class will examine

several models of student discipline while evaluating some of their own classroom management and discipline policies. This class is appropriate for all K-12 educators.

Effective Co-Teaching Practices (CPD-214)

As we transition into another governing set of learning standards, it is essential to unpack and familiarize ourselves with the Next Generation Learning Standards. While it can be frustrating to align our classrooms to yet another set of standards, it is essential to realize that these standards are aiming to better support educators in their instructional practice and provide us with the tools for preparing our students for the 21st Century. This course will assist educators in getting started with the Next Generation Learning Standards and aligning their materials and lessons to these new and improved requirements. Each educator will have the opportunity to create student resources, collaborate with their peers, and exchange ideas and best practices.

ELLs: Meeting the Academic Needs of English Language Learners (CPD-142)

English language learners present special challenges for teachers in today's classrooms. A successful ELL teacher learns to balance the language learning needs of the students with the appropriate content. The knowledge and skills students gain in ELL classes positively affect their lives at school and home. As the diversity of the United States increases, so too does the need for teachers of second language learners. This class is appropriate for all K-12 teachers.

Embracing Student Diversity and Immigrant Students in the K-12 Classroom (CPD-312) *New Course!*

Culturally competent educators understand the diverse needs of their students and establish a culture of learning that provides opportunities for all students to succeed. Across the nation we are seeing a cultural gap that educators must navigate, including the challenges that current immigration issues and language differences have established. Educators in this course will develop strategies for incorporating, and celebrating, students' strengths and differences into daily lessons. Each educator will develop strategies for creating lessons and integrating strategies to become a more culturally competent teacher while promoting a safe space for learning and cultural differences.

Emotional Disabilities – Best Practices (CPD-126)

Students with emotional disabilities are being educated in the mainstream setting at an increasing rate. This course will provide strategies and techniques for meeting the needs of the emotionally disabled student in the mainstream classroom. Participants will research, analyze, and develop strategies on building positive personal relationships with students and behavior modification. This course will offer recent research on behavior modification programs and their implementation in the classroom. Through internet articles, websites and

case studies, participants will focus on how to provide the essential structure that students with E.D. require, even during “unstructured” activities and transitions.

[Emotional Security and Safe Schools \(CPD-218\)](#)

Emotional security and safety of staff and students in schools, it starts with educating our staff on what this entails. When it comes to safety in schools, most people respond with answers related to security systems or police presence in schools. These physical precautions to safety are often the focus of schools when trying to keep staff and students secure. We must not ignore though, a key component in keeping our schools safe: emotional security. How students feel when they are in school shapes learning and student development. The emotional security component is often overlooked for physically safer schools. The reality is emotional security needs to be just as important. It needs to be deeply rooted into the culture of a school, both for staff and students. This course is appropriate for all K-12 teachers and school professionals.

[Empowering Today's Teenager \(CPD-104\)](#)

The adolescent brain, like the rest of their body, is still growing and changing. Many teens deal with issues such as impulse control, erratic behavior, changing bodies, increased emotions and coping skills. Teachers need to be able to understand these issues and be equipped with strategies for assisting students through them. Teachers in this course will research the issues facing today's teenager and how these issues impact the classroom. Teachers will develop lessons and instructional strategies for helping students learn to control impulses, level out erratic behavior and deal with their changing bodies. This course is appropriate for grade 6-12 educators.

[Engaging, Motivating and Exciting Learners \(CPD-264\)](#)

Students need to be engaged and excited about learning to meet their full potential. This course will allow educators to develop and implement strategies that increase student motivation and engagement. Educators will analyze different tools for creating fully engaging lessons where students are both excited to learn and able to meet their full learning potential. Course materials will assist educators in gaining more active student engagement in classroom lessons and motivation.

[Engaging, Motivating and Exciting Learners During Remote Learning \(CPD-298\)](#)

Students need to be engaged and excited about learning to meet their full potential. This challenge has intensified during remote learning. This course will allow educators to develop and implement strategies that increase student motivation and engagement. Educators will analyze different tools for creating fully engaging lessons where students are both excited to

learn and able to meet their full learning potential. Course materials will assist educators in gaining more active student engagement in classroom lessons and motivation.

[Equity and Social Justice in the Classroom \(CPD-310\)](#)

New Course!

Educators in this course will develop their capacity for implementing strategies that create more equitable learning environments and stress social justice. Topics covered in detail include: Multicultural Education, Equity Mindset and Social Justice Education, Systematic Racism in Education, Culturally Responsive Literacy, using technology to bridge opportunity gaps, and challenging biases.

[Gifted Teaching and Learning in Every Classroom \(CPD-262\)](#)

When students with “exceptional abilities in any area that exceeds grade level expectations,” we consider them to be gifted. If teachers are unable to identify these students and modify their curriculum, they often become the least likely to succeed in your classroom. They can become frustrated, bored, and uninspired. In this course, educators will learn how to identify gifted students, address the unique challenges they experience, create appropriate assignments & differentiate your own pre-existing plans. The resulting techniques and instruction energize and motivate students and ignites curiosity and inspires students to challenge themselves to learn and grow in amazing new ways. This course is appropriate for all K-12 teachers and school professionals.

[Google Apps – The Paperless Classroom \(CPD-272\)](#)

Can my classroom function the same way going paperless? Am I prepared for virtual learning? Is it possible? How much work is it? This course will examine the ins and outs of utilizing Google Drive and Documents to foster student collaboration and rich learning opportunities. Participants will familiarize themselves with Google Drive, Docs, Sheet, Forms and Slides. Each participant will create worksheets, presentations, quizzes and activities that exist “sans paper” and allow their students to work collaboratively around essential 21st Century tools that they will need to master for success in the workplace. This course is appropriate for all K-12 educators.

[Health Sciences Applied to Coaching \(CPD-402\)](#)

The course is a series of interactive exercises and activities designed to study Health Sciences as they apply to coaching sports. Through these activities, exercises, and health application to coaching topics, participants will gain information, organize it for professional and personal use, and apply it to their programs. Health Sciences as applied to coaching will also help define selected principles of biology, anatomy, physiology, kinesiology related to coaching; risk minimization; mixed competition; selection and classification of athletes; age and maturity of athletes.

[How to Flip Your Classroom \(CPD-122\)](#)

One of the hottest buzz phrases in education today is the “flipped classroom.” The premise behind the flipped classroom is to create an environment where the lecture and homework aspects of a course are reversed. Today’s student, who is more tech savvy than ever before, is equipped to access content at home, replacing the traditional in-class lecture. This then allows for class time to be spent applying concepts and completing guided practice activity with an increased opportunity for student questioning. Flipped lessons provide for more active learning opportunities with students taking more responsibility reaching learning objectives. This course will analyze the theories and research supporting flipped lessons, as well as introduce educators to online tools and resources to create a successful and meaningful flipped experience. Participants will explore and utilize many free resources including TED TALKS, Khan Academy and the NY Times.

[Hypin’ Up Remote Learning – Hyperdocs, Textset, Collaboration and more \(CPD-300\)](#)

A challenging aspect of remote learning is building activities that allow for students to collaborate and learn from one another. There are several methods for achieving this challenge, and participants in this course will examine tech tools that allow for collaboration. Each participant will develop lessons that include hyperdocs, Multimedia Text Sets and other collaborative strategies.

[Improving Classroom Discussions with Technology \(CPD-324\)](#)

New Course!

The available technology today’s educators are able to utilize allows for student-led discussions that increase collaborative learning. This course will cover several of these free to use apps, giving each educator the opportunity to explore, participate and develop their own assignments for each app. These are all free-to-use applications that work in any classroom. Educators will develop 21st century learning experiences that improve student learning outcomes for all students.

[Improving Student Outcomes Through Effective Homework \(CPD-136\)](#)

Homework – the mention of the word makes the student in us tremble! As educators we know that we need to assign homework for various reasons from accountability to curriculum pacing demands. We can leverage our HW policies to improve student learning outcomes. Participants will assess their current HW practices and evaluate the components of an effective HW assignment. Teachers will also develop paperless assignments as well as flipped lessons and HW assignments. This class is appropriate for all K-12 educators.

[Improving Teacher Questioning Techniques \(CPD-148\)](#)

The fastest way to get our students thinking at a higher level is to question them at higher level. With higher and more exhaustive standards being placed on our students, we must use

our ability to question students in a manner that improves their ability to think critically, and problem solve. This course will prepare teachers to meet the demands of the Common Core State Standards and improve student learning outcomes. This course is appropriate for K-12 teachers.

[Incorporating Social and Emotional Skills in Your Classes \(CPD-236\)](#)

To teach the whole child, we as educators must understand that learning is also a social and emotional experiences. Knowing one's emotions, how to manage them, and ways to express them constructively are essential life skills. These skills enable one to handle stress, control impulses, and motivate oneself to persevere when faced with personal, academic, or work-related obstacles. A related set of skills involves accurately assessing one's abilities and interests, building upon strengths, making effective use of family, school, and community supports and resources. These social emotional skills thought processes and behavioral strategies can be contributing factors to one's success beyond the academic assessments.

[iPads and Tablets in the 21st Century Classroom \(CPD-216\)](#)

The iPad/tablet are at the forefront of 21st century classrooms. These devices facilitate learning, enhance classroom experience, and motivate students to learn. Participants will develop an understanding of major research based instructional strategies and models for utilizing iPads/tablets in their classes. Participants will research educational applications and analyze how the iPads/tablets can improve student academic performance and provide differentiated instruction to close the learning gaps for struggling students. Finally, participants will explore the obstacles teachers face when using iPads/tablets in the classroom and strategies to overcome them.

[K-6 Tools for Increasing Communication & Critical Thinking Skills \(CPD-322\)](#) *New Course!*

Educators in this course will examine and develop tools to differentiate instruction, engage students with creative formative assessments, and allow for student choice in the elementary classroom. This course will fully develop lessons and strategies for use in both in-person and remote instruction.

[Leveraging Tech Tools to Assist Special Education Populations \(CPD-320\)](#) *New Course!*

Today's increase in educational apps, tools, and extensions have impacted the way educators deliver instruction, and perhaps the most profound results have been in assisting students with learning disabilities. Educators in this course will examine free and easy to use tools for assisting with reading, writing and study skills, as well as behavior and classroom management. Educators will develop classroom ready assignments and lessons.

[LGBTQI Education \(CPD-230\)](#)

According to statistics gathered by GLSEN, the Gay Lesbian Straight Education Network, ten percent of the population is gay, bisexual, or transgender. These students come to school with the needs of any other student. Transgender and gender non-conforming (TGNC) youth are quickly becoming more visible in society. Parents of gender non-conforming children are coming to mental health providers in increasing numbers and are often met with stigma and bias and a lack of education on TGNC health. TGNC youth are turned out of their homes at disproportionate rates and harassed and bullied in school at higher rates than their gender conforming peers. They have higher rates of suicide, depression and substance abuse and face unique medical, legal and social barriers. They also have produced their own cultures and communities to face these challenges. This course will examine the research on TGNC youth in the context of the practical challenges faced by these individuals and their families.

[Managing ADHD and LD in the Classroom \(CPD-110\)](#)

There is no teacher that hasn't come across a student in their class with ADHD or a Learning Disability. This course will allow teachers to examine current research geared at helping all teachers work effectively with students with ADHD and learning disabilities. Teachers will understand the impact of ADHD on a student's performance, the difference between male and female students with ADHD and be made aware of basic instructional strategies to implement in their classrooms.

[Multi Cultural Education for the 21st Century \(CPD-196\)](#)

Teachers in the 21st Century classroom are facing the most diverse group of students from a racial, cultural, ethnic and socioeconomic background. As diversity increases, so does the need for teacher training in developing pedagogical skills to meet the demands that are a result of this increased diversity. Teachers in this course will develop lessons and instructional strategies that benefit all students, native English speaking and ELL students. Teachers will develop competencies and skills to teach within their content and implement an understanding of how language is structured, acquired, developed, and how they vary.

[Nature-based Pedagogy in the Elementary Classroom \(CPD-308\)](#)

New Course!

Playful engagement in nature can be a powerful tool for learning. That's common sense to many who spent their childhoods in nature observing a cicada exit its shell, watching ants at war or picking a dandelion to blow its seeds to make a wish. In this course, you will learn about the research and best practices that underpin a classroom that utilizes nature as the forefront. Participants will learn how to use nature to harness their students' curiosities through meaningful lessons and activities in and out of the classroom. Anchored in research about how children connect to the natural world and explore, this course will foster a love, dependence and appreciation of our Earth and all its gifts.

Parent Contact Made Easy (CPD-130)

This course will address an ongoing question that many educators voice every year- How do I increase communication with my students' parents? Every teacher can relate to spending their prep periods, lunch periods and time after the school day trying to get in touch with a parent. The frustration that can build up can leave educators feeling helpless. This course will introduce participants to a couple of highly effective methods for increasing parent contact. In today's world of APPR, parent teacher communication is a must. Many districts' plans are assessing educators on such factors as communication skills with parents. By learning a few techniques you can increase the levels of communication and save yourself valuable time as well! Participants will research the impact of communication on addressing poor behavior and performance, as well as reinforcing achievement, improvement and positive behavior. This course will address online communication tools including teacher blogs, Remind101 and email distribution lists. Participants will also analyze how increased reliance on technology and social media is playing a role in the current trend of the "flipped classroom." This course is appropriate for all grade level/subject teachers.

Play-Based Pedagogy in the Elementary Classroom (CPD-306)

New Course!

The science of brain development has provided us with solid evidence that there is real power in play. Play is the vital activity that children use to learn about and interact with their world, and gain the mental, physical and social and emotional skills necessary to succeed in their adult lives. This course will answer three core questions: What does it mean to have a pedagogy of play and why is it important? What does playful learning look and feel like in classrooms and schools? How do educators set up the conditions where playful learning thrives?

Preparing for Remote Learning and Evaluating its Effectiveness (CPD-286)

To fully engage with students in remote learning, it is important to understand the current readiness students have at home. Participants in this course will develop a survey to gauge student readiness for remote learning. Participants will also look at strategies for evaluating their remote instruction to improve student learning outcomes.

Principles, Philosophy and Organization of Athletics (CPD-400)

The course covers basic philosophy and principles as integral parts of physical education and general education; State, local and national regulations and policies related to athletics; legal considerations; function and organization of leagues and athletic associations in New York State; personal standards for the responsibilities of the coach as an educational leader; public relations; general safety procedures; general principles of school budgets, records, purchasing and use of facilities.

[Remote Learning with Hyperdocs, TextSets and Collaboration \(CPD-284\)](#)

A challenging aspect of remote learning is building activities that allow for students to collaborate and learn from one another. There are several methods for achieving this challenge, and participants in this course will examine tech tools that allow for collaboration. Each participant will develop lessons that include hyperdocs, Multimedia Text Sets and other collaborative strategies.

[Social Emotional Strategies During Remote Learning \(CPD-278\)](#)

Technology has become ubiquitous in today's classroom amid a global pandemic and school closures. With all of these innovations in technology, it's important to take time to reflect on how to most effectively use our time with the most appropriate tools for social emotional learning. To teach the whole child, we as educators must understand that learning is also a social and emotional experiences. Knowing one's emotions, how to manage them, and ways to express them constructively are essential life skills. These skills enable one to handle stress, control impulses, and motivate oneself to persevere when faced with personal, academic, or work-related obstacles. A related set of skills involves accurately assessing one's abilities and interests, building upon strengths, making effective use of family, school, and community supports and resources. These social emotional skills, thought processes and behavioral strategies can be contributing factors to one's success beyond the academic assessments. This course will also explore how underserved communities will not have the opportunities to access some of the materials presented.

[Special Education Strategies During Remote Learning \(CPD-280\)](#)

As we transition into a new way to educate our students, it is essential to unpack and familiarize ourselves with how this will affect students with disabilities. While it can be frustrating to shift our classrooms to a virtual setting, it is essential to realize that special education students will be impacted more than most students during this time. This course will assist educators in getting started with strategies for special education students during remote instruction, identifying their needs and helping them advocate during these unprecedented times. Each educator will have the opportunity to create student resources, collaborate with their peers, and exchange ideas and best practices.

[STEM Education in the Remote Classroom \(CPD-294\)](#)

With transitions to remote and hybrid instruction, it is still as essential as ever before to cultivate problem solving skills in our students. Integrating STEM tasks into your classes allows students to develop critical thinking skills and problem solving skills in order to be successful contributors in the 21st century workforce. Educators in this course will develop strategies to increase their students' STEM fluency and exposure to authentic and valuable STEM problem solving activities.

[Stoic Calm – Building a Strong Mindset \(CPD-304\)](#)

Multiple times per week our inboxes are flooded with new alerts and updates regarding the health of our school environments. Today’s students and staff share anxious and worrying concerns about their school and their learning communities. How can we approach this seemingly endless stream of bad news? The answer is through Stoicism. In this course you will learn ways to quiet the mind when encountering negative thinking and take steps to make both you and your students feel better about themselves no matter what news arrives. You will be able to breathe and guide your mind through visualizations and steps in cognitive distancing every day. As teachers, we all face the dilemma of not having enough time to teach with depth and it seems like we are always just scratching the surface.

[Strategies For Improving Study Skills \(CPD-108\)](#)

Sometimes we take it for granted that students “know how” to study. Study skills are a skill set that many of our special education students need to improve. With more and more focus on national standards and testing, how can we assist these students to meet the more rigorous requirements? This course will allow educators to build skills and instructional strategies for improving student’s ability to listen, note-taking, textbook reading, test taking strategies, and paper/essay writing. This course will also introduce strategies for teaching students anxiety and stress reduction techniques. This class is appropriate for all K-12 general and special education teachers.

[Successful Remote Teaching Strategies \(CPD-276\)](#)

A consequence of COVID-19 has been the inability of students and teachers to return to education as usual. The inability to teach in front of a classroom to a full room of students, in person, has had a detrimental impact on both how students feel about their teachers and their learning, and how teachers feel about their ability to do the job well. Questions about hybrid learning, remote learning, distance learning, applications, resources, and technology issues are constant. In this ever-changing, ever-confusing environment, it would be helpful to have resources, contacts, colleagues, and ideas at your disposal, to help alleviate your concerns and bring learning (and fun!) back “into” the classroom.

[Tackling Trauma \(CPD-234\)](#)

Research shows that up to 25 percent of all students in a school have experienced some form of trauma. This percentage rises to 80 percent when we talk about special education students. This trauma results in difficulties regulating behaviors and likely leads to cognitive and executive function difficulties. Many students are unable to regulate internal behaviors and as a result display withdrawal, shutting down and zoning out. Educators will examine the impact of trauma on cognitive and emotional growth, the learning challenges that result from trauma, and trauma-informed classroom strategies.

[Teacher as Counselor: Appropriate Strategies for the Classroom \(CPD-140\)](#)

Educators do not stop at just delivering the curriculum. We are constantly an open ear or a warm shoulder for our students. Today's teacher has much more on their plate when it comes to counseling students within the classroom. This course will introduce teachers to some basic strategies for assisting students through many common issues, such as anxiety, bullying, conduct disorder and oppositional defiant disorder. Participants in this course will also analyze methods for setting up appropriate boundaries with students. This course is appropriate for all K-12 educators.

[Teacher Leaders and Racial Equity \(CPD-318\)](#)

New Course!

The past two years have emphasized structural inequities in the education system, and society. As educational leaders, these challenges have resulted in the need for us to take steps to disrupt racial inequities that are found in policies and practices. This course will allow leaders to focus on current failures related to student outcomes, expand their research and capacity to build racially equitable practices, and strengthen leadership without negatively impacting student achievement.

[Teaching Kids to Code! \(CPD-314\)](#)

New Course!

This course will prove that anyone can teach coding! Many educators have anxiety when trying to incorporate coding activities into their lesson plans, but with a little effort, you will be on your way to teaching kids to code! Educators in this course will utilize multiple resources to introduce computer coding, an essential 21st Century digital skill. Participants will develop lesson plans that can be implemented into their classrooms that get their students coding today!

[Teaching Students Grit and Ownership \(CPD-198\)](#)

Grit can be described as its own acronym: guts, resilience, integrity and tenacity. Ownership is essential for grit to be fostered throughout education as students need to be invested as a learner in their actual learning experience. One characteristic that has emerged as a significant predictor of success is grit; regardless of socioeconomic status, social intelligence and IQ. Grit and ownership are something that can be instinctual; however, will easily be influenced and reinforced if mediocrity is celebrated at an overwhelming rate. Reaching mastery on a task is often overlooked with the over-saturation and exposure to the breadth of curriculum and activities offered to our youth today. Grit and ownership are something that teachers use to compare themselves to today's youth and their students. Rather than lecturing the "back in my day" approach, educators can find unique and personalized methods to approach this topic with their students through this course. In some cases, students in poverty have to overcome many obstacles just to make it to school which is a demonstration of grit in itself.

[Teaching Together \(CPD-274\)](#)

This course is designed to assist all educators in developing and utilizing effective practices to successfully mentor novice teachers and teachers in need of help. In addition, the course will explore the benefits that experienced teachers can gain by collaborating with colleagues in peer coaching programs. Because teaching is such a complex and demanding profession, it is important for new teachers to be provided with a support system that allows them to transition from theory to practice. Recent legislation in many states calls for mentoring new teachers in order to help them improve and strengthen their skills and practices and thus, keep them in the profession. Many reports suggest the next decade will see a huge turnover in the teaching profession as older teachers begin to retire and younger ones replace them. This course will assist teachers in creating a support system for their colleagues that will help to increase behavioral and academic results for all students, utilizing equitable practices that include underserved populations so that the playing field is leveled. This course supports the premise that all educators are lifelong learners and that working in partnership with colleagues enhances classroom practices, improves students' learning and builds social communities. This course is appropriate for all K-12 school professionals.

[Technology in the Common Core Math Classroom \(CPD-128\)](#)

Technology is a ubiquitous part of children's lives. It is transparent. Most homes have connected computers or Internet-enabled devices. As prices of technology drop, computers and digital devices may replace television as we know it. Now, walk into a classroom. Are there computers and if so, how are they being used? Are they being used at all? Technology has revolutionized the way we think, work, and play. Technology, when integrated into the curriculum, revolutionizes the learning process.

[Technology Tools For Every Classroom \(CPD-124\)](#)

This course will allow educators to build a repertoire of tools for integrating technology into the classroom. Utilizing technology in your content area is more than letting students "use computers" or going to a computer lab. This course will allow educators to explore online tools and other strategies for integrating technology into their daily lesson plans. Course participants will research and develop classroom strategies for surrounding blended learning, flipped classroom, QR Codes, instructional games, TED Talks and lesson plans, Khan Academy, instructional videos, and utilizing mobile devices in the classroom. Teachers will also explore technology options for communicating with parents.

[The Paperless Classroom \(CPD-102\)](#)

Can my classroom function the same way going paperless? Is it possible? How much work is it? This course will examine the ins and outs of utilizing Google Drive and Documents to foster student collaboration and rich learning opportunities. Participants will familiarize themselves with Google Drive, Docs, Sheet, Forms and Slides. Each participant will create worksheets, presentations, quizzes, and activities that exist "sans paper" and allow their students to work collaboratively around essential 21st Century tools that they will need to master for success in the workplace.

Theory and Techniques of Coaching (CPD-404)

The course will begin with an introductory phase in which the basic concepts common to all sports will be discussed. Topics will include a history of interscholastic athletics in New York State. The objectives, rules, regulations and policies of athletics, as well as performance skills, technical information, and organization and management practices will also be among the topics covered. The special training and conditioning of the athletes in specific sports, the fitting of equipment, specific safety precautions and officiating methods will also be examined.

Understanding Mental Health and Mental Illness (CPD-226)

Mental health and illness is a component of teaching that has evolved and increased in importance in recent years. The role of the teacher does not include diagnosis or treatment recommendations for student with mental health diagnosis. It does include: teaching of mental health literacy; responding to student's/parent's concerns by supportive listening and referral to the most appropriate person within the school to help address those concerns (such as a counselor, social worker, psychologist) and providing ongoing academically appropriate support to the student as part of the school's integrated response to the student's needs.

Using Project Based Learning to Meet the NGLS (CPD-150)

As we prepare the 21st Century Students for the 21st Century workforce, we need to arm them with the ability to problem solve and think critically. Project Based Learning is one method for improving critical thinking skills in our students. PBL prepares students for the problem solving activities the 21st Century workplace will demand. Teachers will focus on best practices related to PBL and how to increase critical thinking skills and performance. This course is appropriate for all K-12 teachers.

Using Social Media in the Classroom (CPD-146)

Is there any escaping social media in today's society? Especially in education, we hear a great amount about the harm and dangers of social media for our students. This course will help teachers move past the negative aspects of social media and allow for a focus on using social media in the classroom to help motivate students to learn. Teachers will examine how they can utilize tools such as Facebook, Twitter, and Instagram to modernize their lessons. Teachers will also research and implement methods for using social media as a motivator in the classroom to keep students engaged in the learning experience.

Utilizing Digital Portfolios in the Classroom (CPD-316)

New Course!

Educators in this course will become familiar with digital portfolios and their classroom implications. Being that portfolios make classroom learning more accessible to parents, administrators, and other district support staff because they provide a window into student learning, participants in this course will improve and build upon their classroom culture and family connections.

Wake Them Up! – Motivating Lessons (CPD-144)

We have all been there – we’ve prepared a great lesson, developed a “hook” to keep students engaged and ready to learn, only to see student interest fizzle out as the lesson progresses. Keeping students engaged and active participants in the learning process is the most important aspect of lesson planning. This course will discuss strategies for “hooking” students and keeping them as active participants in the learning process. This class is appropriate for all K-12 teachers.

What You Need to Know About Vaping (CPD-250)

The VAPING EPIDEMIC has created an immediate resource crisis for parents, schools, agency workers, administrators, counselors and support staff. This course will cover all pertinent facts and fictions related to electronic nicotine delivery devices including up-to-date information on the changes in vaping regulations, and the what-we-know-to-date on the pulmonary cases outbreak across 38 states will be addressed.

You’ve Got it Backwards: Understanding By Design (CPD-254)

Though there are many criticisms and labels given to UbD or Understanding by Design templates and course structures, the overwhelming research shows that when teachers plan using this method, they are ensuring the curriculum, content, and assessment are aligned with specific student outcomes and transferable skills. And in addition to its clear cut path to successful teaching strategies, the UbD framework ensures that students will be able to effectively reveal his or her understanding. UbD allows for students and teachers to focus on complex tasks, authentic opportunities to learn and explain, interpret, apply, shift perspective, empathize, and self-assess. Educators in this course will examine the pros and cons of Understanding by Design and determine whether this framework and its provided templates can work in the classroom. Each educator in this course will focus on understanding how backwards planning can improve his or her teaching.

Your School is BYOD – Now What? (CPD-134)

As schools look to integrate technology and create digitally well-versed students, many are arriving at the decision to implement “bring your own device” policies (BYOD). As this allows for more students to have devices in front of them during instruction, it does create the need for educators to experts on many instructional technology tools. This course will focus on formative assessments, cloud syncing, content sharing, expression, link sharing, screen casting, electronic note taking, online presentations and many other tools to leverage the BYOD classroom. This course is appropriate for all grade level/subject teachers.

Are you ready to elevate your teaching career? CPD now offers **Micro-Credential Courses**

Micro-Credentialing offers Macro-Rewards for your teaching career.

- Take 4 courses to earn a Digital Badge
- Professional Development
- Graduate Credit in Continuing Education with MNU
- Individual proficiency in a specific content area

Micro Credentials

We offer 8 Micro Credential Stacks, all comprised of 4 micro courses that can be taken one at a time, or as part of the stack. Each micro course is 15 hrs/1 credit. Graduate credits through MidAmerica Nazarene are available for all micro courses.

<h2>Stem Facilitation</h2>	<ol style="list-style-type: none"> 1. Creating a Positive STEM Classroom 2. Promoting STEM Approaches 3. Promoting Youth In STEM 4. Meaningful STEM Lessons
